

# FUAD SEID

## SOFTWARE ENGINEER

### Contact

#### Phone

0907242838

#### Email

fuadbuste.com

#### Address

Addis Ababa , Ethiopia

#### Github

<https://www.github.com/Fuadseid>

### Expertise

- Flutter
- React
- Laravel
- Node.js
- Django
- MongoDB
- Machine Learning
- Software Project Management
- Software Architecture Design
- Figma

### Language

English  
Amharic

### Reference

Lorna Alvarado

### About Me

My name is Fuad Seid, and I am a student at Debre Birhan University, where I am pursuing a degree in Software Engineering. During my time at the university, I have developed a diverse skill set that includes Flutter development for mobile applications, full-stack web development using React, Laravel, Node.js, Django, and MongoDB for database management. Additionally, I have gained experience in machine learning, software project management, and software architecture design, equipping me to tackle complex challenges in the tech industry. These experiences have not only enhanced my technical abilities but also prepared me to contribute to innovative projects in the future.

### Experience

#### DebreBirhan University 2021 - present

##### Software Engineer

During my time at Debre Birhan University in the Software Engineering department, I gained extensive experience in various areas of software development. I specialized in Flutter for mobile app development and honed my skills in full-stack web development, utilizing React for the front end and frameworks like Laravel, Node.js, and Django for the back end. Additionally, I worked with MongoDB for database management, allowing me to create robust and scalable applications.

My education also provided me with a solid foundation in machine learning, where I developed predictive models and analyzed data to enhance application functionality. Furthermore, I acquired knowledge in software project management and software architecture design, which equipped me to effectively plan and execute projects while applying best practices in system design. These experiences have prepared me to tackle complex challenges in the tech industry and contribute to innovative projects in the future.

### Education

2026

#### Debrebirhan University

##### Software Engineering

I hold a Bachelor's degree from Debre Birhan University, located in the Amhara region of Ethiopia, approximately 113 kilometers from the capital city, Addis Ababa. My time at the university provided me with a solid foundation in software engineering, where I developed a diverse skill set in areas such as Flutter development, full-stack web development, and machine learning.
